**Lucky Mojo's Matches** All  
 Lucky Mojo's future home matches will be played at the visiting team's establishment until their table is brought up to standard **AND** the President, or Vice President is notified by the team Captain or representative **and** they have inspected and approved the repairs/updates. Any questions, contact the President or Vice president at the numbers listed in the rules.

## Scoresheets

Bonnie & Clyde's, you had a Quinton Miller in your lineup the last week you shot against Hitch-n-Post. I am assuming that was Quinton Wolf, or is there actually a Quinton Miller as well? I marked the games for Quinton Wolf. If it is different please let me know asap.

## Rosters

Due tonight, (**January 1st per league rules**), you must turn in your final roster of five regulars and five subs. For those teams that have had more than five subs shoot for them, you must narrow it down to only five subs. Also, there are several teams that still have less than the ten allowed shooters listed. You will not be allowed to add or change anyone after **tonight**, even if you only have nine shooters listed. This means that your final roster should be turned in tonight. All teams also remember that anyone with a designation of "**ineligible**" next to their name is not a legal shooter for their team, thus they cannot shoot on any given night of play. **Captains of each team need to monitor this yourselves**, ensuring that those teams are not utilizing these players.

## Tables

Again....There are still issues with Lucky Mojo's table that need to be fixed before the next home match or the match will be relocated. A couple rails are dead and need tightening or replaced and the felt is pretty bad. The cue ball itself is either too big, too heavy or a combination of one or more along with the felt. The cue ball should not follow through an inch after it hits the object ball when you put a healthy draw on the shot. Also, **John's Main Event** table has a few large stains on it still. While this does not affect the playability ie; faster or slower, please look into if it is at all a possibility to clean it up so it is not as distracting.
